

In the task below I have two arrays:

Array 1:

```
[  
  { id: "abdc4051", date: "2017-01-24" },  
  { id: "abdc4052", date: "2017-01-22" }  
]
```

and array 2:

```
[  
  { id: "abdc4051", name: "ab" },  
  { id: "abdc4052", name: "abc" }  
]
```

I need to merge these two arrays based on id and get this:

```
[  
  { id: "abdc4051", date: "2017-01-24", name: "ab" },  
  { id: "abdc4052", date: "2017-01-22", name: "abc" }  
]
```

How can I do this without iterating through Object.keys?
